

PHAM NGUYEN ANH TRUNG

.NET Backend Developer | ASP.NET Core | RESTful API | SQL Server

Phone: 0961 844 664 | Email: phamnguyenanhtrung2003@gmail.com | GitHub: github.com/PhamTrung1307 | LinkedIn: linkedin.com/in/phamnguyenanhtrung | Location: Ho Chi Minh City, Vietnam

PROFESSIONAL SUMMARY

Junior .NET Backend Developer with 1+ year of hands-on experience building production-grade business management systems. Proficient in ASP.NET Core, EF Core, SQL Server, Clean Architecture, and RESTful API design. Track record of delivering scalable, secure SaaS platforms with full-stack capabilities ReactJS. Passionate about backend engineering, system design, and modern enterprise application development.

TECHNICAL SKILLS

Backend	ASP.NET Core, Web API, EF Core, LINQ, Dependency Injection, Repository Pattern, Clean Architecture
Database	SQL Server, MySQL, Schema Design, Query Optimization, Indexing, Stored Procedures
Auth & Security	JWT Authentication, Refresh Token Rotation, Role-based Authorization, ASP.NET Identity
Frontend	ReactJS, HTML5, CSS3, JavaScript, Tailwind CSS, Bootstrap
Tools & DevOps	Git/GitHub, Docker, IIS, Postman, Swagger/OpenAPI, Visual Studio, SSMS
Integrations	Redis (caching), SignalR (realtime), Hangfire (background jobs), CI/CD basics
Concepts	SOLID, OOP, MVC, REST, Agile/Scrum, Pagination & Filtering, Multi-tenant SaaS design

WORK EXPERIENCE

Amazing Tech Software Development Company

04/2024 – 05/2025

Backend Developer

Tech: ASP.NET Core, EF Core, SQL Server, JWT, ASP.NET Identity, Clean Architecture, Docker, IIS, Swagger/OpenAPI

- Designed and delivered 15+ RESTful API endpoints for a garment production management system — covering order tracking, HR, material tracking, and shift scheduling — serving daily operational workflows for internal teams.
- Architected backend with Clean Architecture (Domain / Application / Infrastructure / API), improving maintainability and reducing bug turnaround time.
- Optimized SQL Server performance through strategic indexing and normalized schema design, lowering average query response time on high-traffic endpoints.
- Implemented JWT authentication and role-based authorization for multi-role access control (Admin, Manager, Staff).
- Built reusable pagination and filtering utilities adopted across all major list endpoints, improving API consistency and frontend integration speed.
- Deployed and maintained backend services on IIS and Docker for internal staging and production environments.

Freelance Software Developer

06/2025 – Present

Full-Stack Developer — NexInvoice Management System

Tech: ASP.NET Core (.NET 8), EF Core, SQL Server, ReactJS, Redis, SignalR, Hangfire, Docker, JWT, Tailwind CSS

- Architected and delivered a full-stack SaaS platform supporting customer management, project tracking, contracts, invoices, payments, and reporting workflows from design to deployment.
- Implemented JWT with refresh token rotation, role-based authorization, and secure API protection integrated with Swagger/OpenAPI.
- Built advanced invoice and payment workflows: partial payments, overdue detection, payment confirmation/rejection, and automated status updates via Hangfire background jobs.
- Integrated Redis caching for dashboard and reporting, significantly reducing repetitive database queries.
- Developed real-time notifications (SignalR) for payment confirmations, task updates, and system activity feeds.
- Containerized backend services with Docker; configured multi-environment settings for development and production.

PROJECT EXPERIENCE

Blog CMS Web Application (Full-Stack)

05/2025 – 06/2025

Personal Project

Tech: ASP.NET Core (.NET 8), EF Core, SQL Server, Angular, JWT, ASP.NET Identity

- Built a full-stack CMS from scratch with secure multi-role access (Admin, Author, Reader) via ASP.NET Identity and JWT.
- Applied Clean Architecture across Domain, Application, Infrastructure, and API layers, enabling independent unit testing of business logic.
- Developed RESTful APIs with pagination, full-text search, and filtering; integrated Swagger/OpenAPI for interactive documentation.

Hotel Management System

08/2023 – 01/2024

Academic Project

Tech: ASP.NET Core, C#, EF Core, MySQL, WinForms/WPF, DevExpress

- Designed and built a full hotel management application for room booking, check-in/checkout, service tracking, and billing.
- Normalized MySQL database schema for data integrity across bookings, guests, and transactions; handled edge cases like overlapping bookings.
- Built desktop UI with WinForms/WPF and DevExpress controls for intuitive staff operations.

EDUCATION

Ho Chi Minh City University of Industry and Trade

2021 – 2025

Bachelor of Information Technology

- Relevant Coursework: C/C++, Java Programming, Web Development, Database Systems, Computer Networks
